---

## SOFTWARE ENGINEER | FRONTEND DEVELOPER

Frontend Developer specializing in React, Vue.js, and Flutter with experience in API integration, cloud deployment, and AI-powered solutions.

---

## WORK EXPERIENCE

### EdgedVR

March 2025 – August 2025

#### IT Intern

6 Aubreen Street, Collaroy Plateau

- Refined and updated the company website using Wix, improving UX and design consistency.
- Prototyped and deployed a custom website (<https://edgedvr.vercel.app>), reducing reliance on Wix and demonstrating scalable development practices.
- Developed and deployed an Express.js API to integrate AI-driven 3D model generation via Meshy.ai and TRELIS 3D, enhancing interactive learning content.
- Led the development of a 6 Degrees of Freedom (6DoF) VR project, coordinating implementation and contributing to immersive learning experiences.
- Collaborated with the creative team to design educational resource materials for instructors.
- Contributed ideas and feedback that supported innovation in VR learning solutions.
- Gained practical experience with Virtual Reality technologies, tools, and industry terminology.

### Insight IT Australia

Aug 2022 - Sep 2022

#### IT Intern

Waterloo, Sydney, NSW

- Installed and configured secure enterprise software using Ninite, improving deployment efficiency and system security.
  - Diagnosed and resolved critical system issues (e.g., BSODs, software crashes), reducing downtime and improving reliability for internal teams.
  - Installed and upgraded computer hardware components (RAM, SSDs, peripherals), enhancing performance for enterprise workstations.
- 

## MY SKILLSET
